Bioscrypt V-Prox™

Two-factor Authentication Combining Fingerprint and Proximity Cards

Eliminate any concerns about stolen, loaned or compromised proximity cards. Match an employee's fingerprint with an enrolled template that is linked to a proximity card in order to confirm the identity of the card holder.
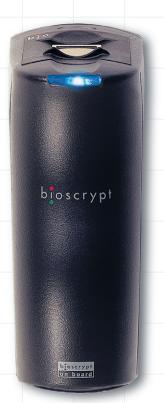

Strong Authentication

- Two-factor authentication – Who You Are (biometric) used with What You Have (card)
- Duress finger option

Self-Contained User Base

- Store ~4,000 templates for 1:1 verification
- Built-in compatibility with integrated HID proximity card reader

Easy Installation & Use

- Plug-and-play installation
- VeriAdmin software for quick and easy initial set-up, template management and device/network configuration
- Self-contained fingerprint unit performs enrollment and verification
- Flexible communication options support Wiegand formats up to 64 bits
- Multiple template administration options include command cards for enroll and delete functions, or local or network connections through VeriAdmin
- Works with most standard existing access control systems
